

McMaster PD Access Centre by SJHH (MPACS)

Intro PD Catheter Insertion Course

September 20-21, 2019

Program Directors

Dr. Robert Yang MSc, MD, FRCPC
Associate Professor, Division of Nephrology,
Department of Medicine, McMaster University

Dr. Karen To MD, FRCPC
Associate Professor, Division of Nephrology,
Department of Medicine, McMaster University

Target Audience

Practicing nephrologists, radiologists, surgeons, and nurses interested in setting up a non-surgical PD catheter insertion program. The maximum number of participants will be limited to eight (8) physicians and four (4) nurses.

Physician Objectives

- To review human anatomy relevant to the insertion of PD catheters
- To learn the bedside unguided and US-guided PD catheter insertion techniques
- To gain hands-on experience performing insertions in a high-fidelity simulation environment

Nursing Objectives

- To learn how to set-up sterile environment and instruments for a PD catheter insertion
- To learn how to assist physicians during an insertion

The two-day course includes some didactic/lectures, but more than half of the total course time will be hands-on sessions in two different wet lab environments. Course materials and all meals will be provided.
