Welcome

Since 1999 CMAS has provided over 12,000 surgeons, fellows, residents and nurses with exceptional hands-on training as well as classroom instruction. CMAS strives to provide a comprehensive learning experience for all of our participants.

CMAS is internationally recognized as one of the premier skills training Centres in Canada, providing personalized training in state-of-the-art techniques and MIS technology for surgeons, physicians, nurses and allied health professionals.

Mehran Anvari, O ONT, MB BS, PHD, FRCSC, FACS
DIRECTOR

Personalized Laparoscopic & Robotic Surgery Training

Based on demand to meet the needs of surgeons across Canada, CMAS is now offering a one-to-one training program in the OR designed to be a procedure specific experience. CMAS programs are focused on improving minimal access surgery techniques by incorporating selective laparoscopic cases in our state-of-the-art surgical suites for interactive dialogue with the operating surgeon. This personalized program also gives access to our hands-on dry labs and wet labs to practice specialized skills and techniques. Follow up support is provided, once the surgeon has completed this training.

Visit www.cmas.ca for more information.

“It was great to get my hands on the laparoscopic instruments & simulations. It gave me an appreciation of the level of difficulty”
